

The Board of Investment (BoI) is joining hands with related agencies to promote the Bio-Circular-Green (BCG) Economy to push forward and stimulate growth over the next five years. They will explore more business categories in high technology. BoI aims to emphasize the bio-economy, as Thailand has more than 30 million people working in the farm sector. BoI has been ordered to adjust its investment promotion criteria to meet the current economic landscape affected by COVID-19, as well as promoting domestic investments that can help the country rebound from the crisis quickly.
