

The Permanent Secretary of the Ministry of Industry presided over an award ceremony for enterprises participating in the project to develop the competitiveness of the agricultural product processing industries in the region, in accordance with One Province One Agro-Industrial (OPOAI) Product Project 2017. He said that the ministry aims to enhance the efficiency of agro-industrial enterprises nationwide. The manufacturing sectors must follow the changes in both domestic and international markets, and have a clear management planning system in production, transportation, marketing, and financial management.
